

FIJI CORAL REEF AND RAINFOREST ECOLOGY

Lessons from nature for a sustainable future

www.livingoceanseducation.com

Sustainable living made real

Fiji Islands are a perfect destination to see healthy natural ecosystems and to experience human communities that are living as sustainably as any on earth.

With hands-on experiential exploration of the coral reefs and rainforests, students will gain a better understanding of these unique and fragile ecosystems – snorkelling, hiking and observing these fascinating tropical environments up close.

Teaching curriculum includes

- Fish Anatomy and Adaptations
- Intertidal and Rainforest Exploration
- Marine and Terrestrial Ecology
- Sustainable Living
- Small Group Marine Research Project
- Data Collection, Write-up and Presentation
- Film Making and Editing

Activities

- Snorkel excursions on coral reefs
- Hiking in rainforests
- Kayak exploration of mangroves
- Swimming under a waterfall
- Traditional Fijian feast and music
- Overnight stay in Fijian village
